PROJECT MANAGEMENT CONSULTANCY

IT / SOFTWARE PARK PROJECT PROFILE

15,00,000 Sq. Ft.

IT SOFTWARE PARK

01 | COMPANY OVERVIEW

Pavana Projects

Pavana Projects is positioned as a professional **Project Management Consultancy (PMC)** focused on structured planning, multidisciplinary coordination, project controls and delivery management for large-scale built-environment projects.

Our approach is built around one objective: **bringing clarity, control and accountability to complex projects** from project initiation through commissioning and handover.

1.5M	360°	4
Sq. Ft. reference project scale	Integrated PMC coordination	Core delivery priorities

Core Delivery Priorities

- **Time:** structured programme management, critical-path monitoring and recovery planning.
- **Cost:** budget visibility, procurement tracking, variation control and commercial discipline.
- **Quality:** inspection planning, documentation, testing and compliance-oriented execution.
- **Safety & Risk:** proactive identification, escalation and mitigation of project risks.

Pavana Projects is designed to act as the client's project-management interface across consultants, contractors, vendors, statutory stakeholders and specialist agencies.

02 | OUR FOUNDATION

Vision, Mission & Values

VISION

To be a trusted project management partner for high-quality commercial, IT/ITES and infrastructure developments, creating measurable value through disciplined project delivery.

MISSION

To plan, coordinate, monitor and manage projects with professional systems that align design intent, construction execution, cost, schedule, quality, safety and stakeholder expectations.

VALUE	WHAT IT MEANS
Integrity	Transparent communication, documented decisions and professional accountability.
Planning	A structured plan before execution, with clear milestones and ownership.
Coordination	One integrated view across design, procurement, construction and commissioning.
Control	Timely information, dashboards, reporting and escalation to support decisions.
Quality	Right-first-time execution supported by inspections, testing and documentation.
Delivery	A practical focus on milestones, readiness, handover and operational outcomes.

03 | SERVICE PORTFOLIO

Project Management Consultancy Services

SERVICE	PMC RESPONSIBILITY
Project Planning & Scheduling	Project brief, WBS, master programme, milestones, look-ahead planning and critical-path monitoring.
Design Management	Design deliverable tracking, multidisciplinary coordination, constructability reviews and interface management.
Tender & Procurement Management	Package strategy, tender coordination, technical-commercial comparison, vendor tracking and procurement schedules.
Construction Management	Site coordination, work-front readiness, contractor interfaces, sequencing and execution monitoring.
Cost & Commercial Monitoring	Budget tracking, commitments, variations, certification support and cost-to-complete visibility.
MEP & Specialist Coordination	Electrical, HVAC, plumbing, fire protection, ELV, BMS and specialist systems coordination.
QA/QC Management	Inspection & Test Plans, material approvals, quality records, NCR tracking and closure monitoring.
HSE Coordination	Safety planning, site observations, compliance tracking, risk identification and corrective actions.
Testing, Commissioning & Handover	Pre-commissioning readiness, system testing, snag closure, as-built documentation and handover coordination.

04 | PROJECT PRESENTATION

15,00,000 Sq. Ft. IT Software Park

The proposed project profile demonstrates Pavana Projects' intended PMC framework for a large-scale IT / Software Park with an overall built-up area of **15,00,000 Sq. Ft.** The PMC role is structured to integrate design, construction, services, procurement, quality, safety and commissioning under a single project-control framework.

15,00,000	IT / ITES	PMC
Sq. Ft. overall project scale	Software Park development	Project management role

PROJECT PARAMETER	PROPOSED PMC FRAMEWORK
Project Type	IT / Software Park / Commercial Development
Project Scale	15,00,000 Sq. Ft.
PMC Objective	Integrated management of time, cost, quality, safety and delivery
Primary Interface	Client / Developer, Consultants, Contractors, Vendors & Authorities
Delivery Model	Design coordination → Procurement → Construction → Testing → Handover
Key Success Measures	Programme adherence, cost visibility, quality compliance, safe execution and readiness for occupancy

Note: The project information above is presented as a **project profile / proposed PMC framework** based on the stated 15,00,000 Sq. Ft. requirement. Detailed building configuration, site particulars, timelines and consultant/contractor packages can be incorporated once formally defined.

05 | IT SOFTWARE PARK

Integrated Project Scope

PACKAGE	KEY PMC INTERFACE
Civil & Structural	Foundations, RCC/structural works, masonry, façade interfaces, waterproofing and associated civil packages.
Architecture & Interiors	Architectural coordination, finishes, common areas, tenant interfaces and design implementation.
Electrical Infrastructure	HT/LT distribution, transformers, DG interface, panels, cabling, lighting, earthing and power-quality interfaces.
HVAC	Central / distributed HVAC systems, ventilation, controls, testing and balancing coordination.
Plumbing & Fire Protection	Water supply, drainage, firefighting systems, pumps, tanks, hydrant/sprinkler interfaces and statutory coordination.
ELV & ICT	Structured cabling, data/voice infrastructure, CCTV, access control, public address and other low-voltage systems.
BMS & Controls	Building automation, monitoring, integration and interface management across MEP systems.
External Development	Roads, drainage, utilities, landscaping, site services and external infrastructure interfaces.
Testing & Commissioning	System-wise readiness, integrated testing, commissioning documentation and handover support.

06 | HOW WE MANAGE

Project Lifecycle & Delivery Methodology

Pavana Projects' methodology is designed to maintain a continuous line of sight from project objectives to final handover.

01	**INITIATE** Define objectives, scope, governance, stakeholders and project controls.
02	**PLAN** Develop WBS, programme, procurement strategy, risk register and reporting systems.
03	**DESIGN** Coordinate design deliverables, interfaces, constructability and approvals.
04	**TENDER** Support package definition, tender coordination, evaluation and award readiness.
05	**PROCURE** Track long-lead items, approvals, manufacturing, logistics and site readiness.
06	**EXECUTE** Coordinate work fronts, contractors, interfaces, quality and safety.
07	**COMMISSION** Drive testing, integrated systems readiness, snag closure and documentation.
08	**HANDOVER** Coordinate as-builts, O&M; documents, training, statutory records and final handover.

07 | CONTROL TOWER

Project Controls & Reporting

Effective PMC depends on timely information. Pavana Projects proposes a structured project-control system that converts site activity into actionable management information.

CONTROL AREA	KEY OUTPUTS	FREQUENCY
Programme Control	Master schedule, look-ahead, critical path, slippage & recovery plan	Weekly / Monthly
Cost Control	Budget, commitments, variations, certification support, forecast	Monthly / As required
Procurement Control	Procurement schedule, approvals, long-lead tracker, delivery status	Weekly
Design Control	Drawing / submittal register, RFIs, approvals, design interfaces	Weekly
Quality Control	ITPs, inspections, test records, NCR tracker, closure status	Daily / Weekly
HSE Control	Observations, incidents, corrective actions, compliance status	Daily / Weekly
Risk Control	Risk register, mitigation actions, escalation and ownership	Weekly / Monthly
Management Reporting	Executive dashboard, decisions required, key risks and milestones	Monthly

Management Dashboard — recommended headline indicators

SCHEDULE
Planned vs. actual progress

COST
Budget vs. commitment / forecast

QUALITY
Open vs. closed observations

08 | INTEGRATED TEAM

Stakeholder Coordination & Governance

Large-scale developments succeed when every participant works to one coordinated plan. Pavana Projects provides a structured interface between the client and the project ecosystem.

STAKEHOLDER	PMC INTERFACE
Client / Developer	Project objectives, decisions, approvals, reporting and escalation
Architect / Design Consultants	Design deliverables, coordination, RFIs, revisions and constructability
Structural / MEP Consultants	Engineering interfaces, drawings, technical clarifications and site support
Main Contractors	Programme, work fronts, quality, safety, resources and progress
Specialist Contractors	Package interfaces, technical submissions, installation and commissioning
Vendors / Suppliers	Submittals, approvals, manufacturing, logistics and delivery tracking
Authorities / Statutory Agencies	Documentation, inspection readiness and compliance coordination
Facility / Operations Team	Maintainability, commissioning, training, O&M; documentation and handover

Governance Principle

Clear ownership • documented decisions • defined escalation • measurable milestones • transparent reporting

09 | BUILT RIGHT. DELIVERED SAFELY.

Quality, Safety & Compliance Management

Quality and safety are integrated into project management rather than treated as end-stage checks. The PMC framework establishes inspection, documentation and corrective-action mechanisms throughout execution.

QUALITY MANAGEMENT	HSE MANAGEMENT
Inspection & Test Plans (ITPs)	Project HSE plan and site safety systems
Material / equipment approval tracking	Work-at-height and high-risk activity controls
Method statement review & implementation	Toolbox talks and safety observations
Inspection requests & test records	Incident / near-miss reporting and corrective actions
NCR identification, tracking & closure	Emergency preparedness and response coordination
Mock-ups / samples / benchmark approvals	Contractor safety performance monitoring
Testing, commissioning & documentation	Compliance records and management reporting

Outcome

A controlled project environment where workmanship, documentation, safety and compliance are continuously monitored and closed through defined accountability.

10 | PROTECTING TIME AND COST

Procurement & Commercial Management

Procurement performance has a direct impact on project schedule and cost. Pavana Projects' PMC approach connects package planning with approvals, procurement, logistics and site readiness.

STAGE	PMC FOCUS
Package Strategy	Define scopes, interfaces, deliverables and procurement priorities.
Tender Coordination	Coordinate tender documents, bidder queries, technical clarifications and comparisons.
Technical Evaluation	Track compliance, deviations, approvals and technical recommendations.
Commercial Interface	Support commercial comparisons, commitments, variations and certification workflows.
Long-Lead Management	Identify critical equipment, approval dates, manufacturing and delivery milestones.
Logistics & Site Readiness	Align delivery schedules with work-front availability, storage and installation sequence.
Change Management	Document scope changes, impact assessment, approval and implementation status.

Commercial discipline is supported by **visibility, documentation and early escalation**—helping the client make informed decisions before cost or schedule impacts become difficult to recover.

11 | PEOPLE & ACCOUNTABILITY

Proposed PMC Organisation Structure

The PMC organisation can be scaled to suit project phase, package complexity and site requirements. The following structure provides clear reporting lines and specialist interfaces.

ROLE	PRIMARY RESPONSIBILITY
Project Director / PMC Head	Client leadership, governance, strategic decisions and major escalations
Project Manager	Overall project coordination, programme, interfaces and delivery management
Planning / Project Controls	Master schedule, progress measurement, dashboards and recovery planning
Civil / Architectural Team	Civil, structural, architectural and finishing coordination
MEP Management Team	Electrical, HVAC, plumbing, fire protection and ELV coordination
QA/QC Team	Quality plans, inspections, testing, NCRs and documentation
HSE Team	Safety planning, observations, compliance and corrective actions
Contracts / Commercial Team	Package administration, commercial tracking and change management
Procurement / Coordination Team	Vendor follow-up, approvals, logistics and long-lead tracking

The team can be deployed in phases, allowing the PMC structure to remain efficient while providing additional specialist resources when project intensity increases.

12 | DOCUMENTATION & DECISION SUPPORT

Key PMC Deliverables

- Project Execution Plan / PMC procedures
- Master Project Schedule and baseline programme
- Detailed work breakdown structure and milestone plan
- Design / drawing / submittal registers
- Tender and procurement trackers
- Long-lead item and material approval tracker
- Weekly progress reports and look-ahead schedules
- Monthly management dashboard
- Cost, commitment and variation tracking
- Risk and issue registers with mitigation actions
- QA/QC inspection and NCR tracking
- HSE observations and compliance reporting
- Testing & commissioning readiness tracker
- Snag / punch-list management
- As-built, O&M; and handover documentation tracker

Decision Support

The purpose of PMC reporting is not simply to record progress. It is to give the client an early view of ***what is on track, what is at risk, what requires a decision and what action is required next****.*

13 | OUR VALUE PROPOSITION

Why Pavana Projects

VALUE	PAVANA PROJECTS APPROACH
Integrated Management	A single coordination framework connecting design, procurement, construction and commissioning.
Client-Focused Governance	Clear reporting, escalation and decision support aligned to client priorities.
Project Controls	Programme, cost, procurement, risk and quality information structured for timely action.
Multidisciplinary Coordination	Interfaces across civil, architecture, MEP, ELV, specialist systems and external works.
Execution Discipline	Focus on work-front readiness, accountability, documentation and closure.
Handover Readiness	Commissioning, snag closure, as-built records and O&M; documentation tracked to completion.

CREATING LANDMARKS, SHAPING FUTURES.
